

## PROJECT ENGINEER III

We are looking for a Project Engineer with 5+ years of experience to join our growing company. This is an experienced position involved in project development and management from conceptual phase through design and construction. The Project Engineer will work with the Project Manager to develop design concepts that are incorporated into the final product.

### OUR COMPANY

Toole Engineers has been providing solutions for the constructed environment for more than 30 years. With a 90% client retention rate, it is obvious that we pride ourselves on client relations and first-class service. Our award-winning team has established a reputation in Georgia, South Carolina, and North Carolina for providing client services, as well as quality engineering from concept development to project close-out documentation. During construction, our team provides customized, on-site management and inspection services to meet even the most aggressive construction schedules. Our services include Planning, Land Development, Transportation Engineering, Municipal Support, Higher Education, Water Resources, and Trails and Recreation.

### THE POSITION

Your duties will include:

- Proposal preparation
- Project development
- Permitting
- Can prepare design computations, construction documents, and contract documents and technical specifications
- Bidding and letting project
